Key-Box 14 - 9400 Cabinet Series

For Storing/Securing All Businesses / Organizations Facility/Asset Keys

Key-Box 14!

The Key-Box software provides a full audit trail and real time reporting, detailing who has used each set of keys and when. As a result, staff become more accountable and our customers have found that keys are returned at the end of shifts. This leads to reduce security requirements, with less loss, damage and liability

Benefits

- Manage, control and report on the use of facility and asset keys
- Identify when keys are taken and returned, and by whom
- Restrict access to specific site and facility keys for staff and contractors
- Improve shift start-ups by ensuring important keys are always in place and ready to use
- Completely remove the need for manual key issue
- Reduce losses and damage by making users fully accountable
- Fully scalable to accommodate any number of keys
- 24/7 Audit trails of all key activities.

Key-Box Key Management Systems are the affordable intelligent choice!

Key-Box Automated Key Management Systems

When Choosing the right key system for your key management requirement is an important task to ensuring that you are choosing a key system that will secure your valuable keys 24/7 Key-Box is an easy intelligent choice as it's the only key system in the market place that offers its exclusive high security 100% solid metal intelligent locking key fobs. Each key fob is individually locked in place inside the cabinet to ensure keys are not removed by unauthorized users

Secure-Lock
Exclusive 100% solid metal
intelligent locking key fobs

Key-Box

Intelligent Solutions for securing your valuable keys/assets

A brief description on how the key-box Secure-Lock locking key fobs work

The way **Key-Box 14** automated key systems work with the individual **High Security Locking Key Fobs.** Each individual user is issued a preselected PIN which is entered on the cabinet keypad. Once the PIN is entered and authorized by the system the door automatically opens and the user will have access to only those keys authorized to them. The remainder of the keys stay securely locked in the cabinet. After a key is removed, the system records when it was taken, when it is returned and the user's information etc. If a curfew or time limit is set in the system, and a key is not returned on time, the system will automatically generate an email to management notifying them of the past due key/keys and user name etc. The system therefore gives you a complete audit trail 24/7 of the usage on your valuable facilities, assets and vehicle keys while encouraging user accountability

Our Secure-Lock 100% solid metal intelligent locking key fobs is the intelligent choice for securing keys

All Key-Box 14 key cabinets include our exclusive Secure-Lock durable 100% solid metal maintenance free locking key fobs for securing your valuable keys/assets

Key-Box 14 Key Management Systems Technical Specifications

Key-Box 14 9400 Cabinet Series

Modular Design Features
Designed to accommodate 14 keys (or key sets), the innovative Key-Box 14 - 9400 Cabinet Series design allows organizations requiring a small automated key system at an affordable price. Standard Solid Metal Door
Key Strips are defined as secure Locking receptor key strips that lock the key fobs in place restricting access to authorized personnel down to the individual key. LED lighting indicate which keys can be taken, which keys are restricted and assist the user when returning the key to the correct location

14 key slot locking key strip with LED indicating lights

The Key-Box 14 is available with 14 intelligent key slot capacity and be Expandable Up to 42 key slot capacity with available 14 key slot expansion key strips

The cabinets can be supplied with a metal door. The control panel consists of the user interface which includes the screen, keypad and access card or biometric reader.

PC Software Administration
The Key-Box 14 9400 series cabinet is administered from the user friendly KeyWin 6 Pro software supporting a Microsoft Access or SQL database.

The Key-Box 14 9400 series cabinets can communicate with the KeyWin 6-Pro software using a range of different options including Ethernet, GPRS, RS485, RS232 and modem. Multiple systems can be networked together over a local or wide area network to provide accountability for a limitless number of keys administrated from multiple
PC workstations running the KeyWin 6-Pro software.

User Identification
The **Key-Box 14** 9400 cabinet can support any type of access control device required to identify a user to the key system. Supported devices include RFID proximity readers from all leading access control manufacturers

KeyWin 6-Pro

Key Management Software

Smart and Simple

Administrative tool for management of your valuable keys

KeyWin 6-Pro **Standard Light software license is included free of charge with all *Key-Box* key management systems with no annual fees*!*

Key-Box Key Systems are Powered By

KeyWin 6-PRO

Standard Key Management Software with Total Accountability

KeyWin 6-PRO Standard Software
Gives you total control. Easy to use, Easy to Manage

Flexible KeyWin 6 makes it easy to manage everything from around 10 keys up to several thousand keys. You can use one key cabinet or 100 key cabinets in the same key management system and at different locations. The key management system can be managed by a single administrator, or shared with other administrators.

Users, groups and keys are simple and quick to register. You determine which users and groups get which keys by connecting them in the key management system. Every use of the key is registered, and a simple search lets you find out who has had what key and when.

KeyWin 6-PRO Standard Software
Countdown Function Feature

This function determines how many times the user can enter the key cabinet, value box or compartment

KeyWin 6-PRO Standard Software

Provides total Control of your keys - Even from the other side of the world

KeyWin 6 keeps your keys in order. You can easily connect via TCP/IP and communicate via the network connection so you can simply administer and program your Key control series key cabinet, whether you are in the same office block or anywhere in the world.

You log into the key cabinet as a user using your personal code. Each key has a key peg with a unique identity, which is placed in a strip that in turn communicates with the KeyWin 6 key management program, where each separate event is registered. The key strips then indicate which keys you have access to or, if a key has already been removed, you receive information on the display about who is using the key. You can also search for historic information about keys in KeyWin5 program.
KeyWin 6-PRO Loaded with Features

Easy to Use
The administrator determines the members of staff who have access to a specific key by entering which user can log into the key cabinet or value box with his or her personal code.

Create User Groups
You can simplify administration when there are many users with different access rights by creating groups. It is possible to create both key groups and user groups

Name Keys
You give each key a name of your choice, or a key ID, to create order in your key management.
KeyWin 6-PRO

Intelligent Search Functions
The search function finds everything in KeyWin, since it searches on files, email, contacts, groups, alarms, etc. - as fast as you type.

Visual Cabinet View
Gives you the option to view the key cabinet's status and edit the keys in the key cabinet.

Time Channel
Limit a group's use by setting a time channel. The group's keys are available when the time channel is active.

Event Log
All events are registered in the log, both from key cabinets and from KeyWin5. You choose what will be shown. The intelligent search function, with select options and timeframe, simplifies obtaining the right information and producing reports

Backup
You can easily create backups for the entire key management program. They are automatically named with the date and time; it is just as simple to restore the backup as it is to create it

Alarm Indication
When you receive an alarm, the alarm is clearly marked by a red event in the event log and you can easily see who or what has triggered the alarm

Export
You can always make a backup of the event log. Either via a CSV file which you can import to Excel or direct to a PDF file

Communication Settings
You have a number of possible communication settings that can be synchronized with your network.

Alarm Settings
You can choose between many different alarms for your key cabinet. For example, door alarm, key alarm, break-in alarm, etc.

KeyWin 6-PRO and KEYBOX Security Key Cabinets

The Key-Box series smart range of electronic key cabinets with electronic key identification for monitoring and control of each individual key. The Key-Box administration is performed using the PC program keyWin 6 Pro, where all events are logged and saved
