

# CyberLock™ Wireless Access Control System

## Advanced Access Control Solutions

### Affordable Access Control Solutions For:

Schools, Colleges, Universities, Hospitals, Commercial Buildings, Law Enforcement, Small and Large Businesses, Housing, Government Facilities, Vending, Machines etc.

**Affordable** access control with full audit capability the CyberLock/CyberKey system is your answer. CyberLock is an innovative lock system that easily converts existing mechanical locks into fully functional wireless access control systems

- \*The intelligent CyberLock cylinder replaces standard 6-pin Schlage Format and Yale Format 6&7 pin mechanical cylinders.
- \*The CyberLock cylinder is virtually pick-proof.
- \*The electronic CyberKey™ cannot be duplicated.
- \*Installations are completed in minutes.
- \*Re-Keying is eliminated.
- \*Access can be restricted to specific times and days.
- \*CyberKeys can be assigned a start date and an expiration date.
- \*An audit report is stored in both the CyberLock cylinder and the CyberKey
- \*The CyberLock system is designed for *indoor* and *outdoor* use in doorways, cabinets, drawers, padlocks, Cam locks, Parking Meter locks, etc.

**DO YOU KNOW  
WHO HAS  
ACCESS TO  
YOUR  
FACILITIES?**

### Installation and setup is easy and user friendly

1-Remove the existing cylinder

Installation at the lock is as simple as removing the existing cylinder and replacing it with the intelligent CyberLock; most installations take less than 10 minutes

2-Replace with CyberLock cylinder

Once installed, CyberLock functions as a complete stand alone system that requires no external power or battery

3-Program and start using your new CyberLock
